

**IN THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended) A combination bassinet, changing table and bedside sleeper structure comprising:
  - a board for supporting a mattress;
  - a substantially oval-shaped rail;
  - a support for said board;
  - rail supports secured to and extending upwardly from said board for supporting said rail a spaced distance above said board;
  - said rail having a removable rod along one substantially straight side; and
  - a fabric member draped over said rail.
2. (Currently amended) The combination structure of claim 1 further comprising:
  - a fixed member along said one substantially straight side of said rail and supported above said board and below said rail to provide a barrier at said one side to prevent an infant resting on said board from rolling off of said board ~~even though~~ when the removable rod has been removed.
3. (Original) The combination structure of claim 2 wherein said fixed member is mounted upon a selected pair of said rail supports.

4. (Currently amended) The combination structure of claim 3 wherein said removable rod is mounted upon a the selected pair of rail supports a spaced distance above said fixed member.

5. (Original) The combination structure of claim 2 wherein said support is adjustable to adjust a height of said board relative to a top of an adult bed.

6. (Original) The combination structure of claim 5 further comprising a device for releaseably attaching the support to the adult bed.

7. (Original) The combination structure of claim 1 wherein said support is adjustable to adjust a height of the board to facilitate use of the structure as a changing table.

8. (Currently amended) The combination structure of claim 1 further comprising[[:]] a fabric storage basket mounted upon said support and beneath said board.

9. (Original) The combination structure of claim 8 wherein said basket is formed of an open weave mesh fabric.

10. (Currently amended) The combination structure of claim 1 further comprising[[:]] a hood removably mounted upon said rail.

11. (Currently amended) The combination structure of claim 1 wherein at least said removable rod is substantially covered with a resilient cushioning sleeve.

12. (Currently amended) A combination bassinet, changing table and beside bedside sleeper structure comprising:

a board for supporting a mattress;

a frame surrounding said board and having an upper cover-supporting portion extending and a frame supporting portion, said upper cover-supporting portion maintained above said board by said frame supporting portion;

a cover draped over said frame ~~and said board~~ and resting on said cover supporting portion;

a second support for said frame and said board, said second support joined to said board and having adjustable legs for adjusting a height of said board and said frame; and

said frame having means enabling use of said structure as a bedside sleeper when in a first position and enabling use as a bassinet when in a second position.

13. (Original) The combination structure of claim 12 further comprising coupling means for releaseably coupling the structure to an adult bed.

14. (Original) The combination structure of claim 12 wherein at least said upper cover supporting portion is covered with a resilient cushioning member.

15. (New) The combination structure of claim 1 wherein said board is mounted upon said support.

16. (New) The combination structure of claim 1 wherein said rail supports are mounted upon said support.

17. (New) The combination structure of claim 1 wherein said rail supports are mounted upon an upper end of said support.

18. (New) The combination structure of claim 1 wherein said rail supports and said board are mounted upon an upper end of said support.

19. (New) The combination structure of claim 1 wherein said rail supports further comprise a mounting portion positioned between said board and an upper end of said support.

20. (New) The combination structure of claim 1 further comprising common fasteners for securing said board and said rail supports to said support.
